EXPERIENCE

EdTeKLA Research Group **Edmonton, Canada**
Research Assistant *May 2026 - Present*

- Contributed to many research pipelines, including literature review, project documentation, **usability study data collection, qualitative data analysis**, and **academic writing for publication**
- Developed a **Python-based logging tool** that captures and **analyzes quantitative data** and gameplay telemetry across two indie games, supporting player behaviour research and **user experience insights**
- Maintained and updated the **CRM** website while addressing security vulnerabilities
- Leveraged **prompt engineering** to develop a website for **user research** involving children that adhered to stakeholder requirements and assessed security vulnerabilities prior to deployment

UAlberta International Genetically Engineered Machine (iGEM) Team **Edmonton, Canada**
Lead Front-End Developer & Lead Product Designer (Case Study Link) *Jan 2026 - Dec 2026*

- Engaged with **stakeholders** of varying disciplines both technical and non-technical, to inform project direction and prospects, ensuring alignment between the project's scientific objectives and its real-world relevance
- Led the software development sub-team within a 24-member project, building an **accessible React-based website** that prioritized **effectively communicating our research report** to inform future work in the field
- Led and **managed multiple cross-functional teams across multiple sub-projects** that contributed to the overall goal, overseeing timelines, prioritizing resources, and ensuring deliverables passed quality standards
- Communicated the project's research and development to an **audience of 10,000** at the **2026 iGEM Jamboree**
- Created and maintained team-wide **visual branding** across promotional materials and merchandise, with designs accounting for **18% of total fundraising revenue earned**.
- Researched **marketing trends** and engagement strategies to inform content creation, contributing to a total of **158% increase in engagement** across all social media platforms
- Directed and produced the promotional video that prioritized the comprehensiveness of the project's mission and pipeline, ensuring the content was digestible in a general context, **earning 5000+ views** across various platforms
- Developed a **Python-based tool integrating APIs** to automate scientific data synthesis, reducing manual analysis efforts, **increasing the research's workflow efficiency**

Network for Applied Technology (NAT) **Edmonton, Canada**
Product Designer (Case Study Link) *August 2025 - Aug 2026*

- Collaborated with the development team of **7 members** to inform wireframe and **mid-high fidelity prototype design**, ensuring alignment between the user's needs and technical feasibility
- Conducted **user research** and **communicated with stakeholders** of varying disciplines to address bottlenecks in current website flow, prioritizing **user-centered design**, effective communication, and website accessibility

EDUCATION

University of Alberta **Edmonton, Canada**
Bachelor of Science in Computing Sciences & Psychology (Double Major) *Sep 2021 - Jun 2026*

Yonsei University **Seoul, South Korea**
International School Summer Program *Jun 2024 - Aug 2024*

- Scholarships: Global Skills Opportunity Award and Education Abroad Individual Award
